REGISTER YOUR SECURITY CAMERAS

AXON FUSUS
Real-Time Crime Center

When businesses, residents and law enforcement work together, we don't just react to crime — we prevent it. You know your property, your people, and your patterns. We bring the tools, training, and response. Together, we create a safer environment for employees, customers, residents, children and the entire community.

Camera Registration

Registering your camera with Euclid Police enables investigators to know a camera is at your location allowing them to request video evidence from you. [REGISTRATION LINK](#)

Real Benefits of Camera Integration

WHAT IS A REAL-TIME CRIME CENTER

The Axon FUSUS platform is a real-time operations hub that connects your existing security cameras to EPD's Real-Time Crime Center. It's not a replacement for your system — it's a secure, one-way connection that allows officers to see what you choose to share only during emergencies or active investigations.

HOW IT WORKS

A small, secure Fusus CORE device links your cameras to EPD's system. You control what's shared and when — full access, limited access, or only during emergencies. You can also upload footage directly through the Fusus ONE portal if you prefer not to stream. It's fully encrypted, non-invasive, and tailored to your comfort level.

LOCAL IMPACT, REAL RESULTS

Cities across the country — and right here in Ohio — are seeing major improvements in crime prevention and response thanks to Fusus. In Euclid, we're already using this technology to build a smarter, more connected public safety network. Your participation strengthens that network.

Participants have told us they feel more empowered, more connected, and more confident knowing they're part of something bigger than just their storefront or home. It's not just about cameras — it's about community.

If you want to know more about camera registration or integration, contact Euclid Community Policing Unit at 289-8449.
